RE: Waste Acceptance Procedures for Asbestos-
Containing Waste Materials
D-051-0090/P-0297
Jefferson Parish

Dear Ms. Sullivan:

We are in receipt of your January 6, 1998 letter, requesting a temporary variance from the approved waste acceptance procedures for handling Asbestos-Containing Waste Materials (ACM) at the above-referenced landfill.

As we understand, the subject waste material is generated as a result of the Westbank Remediation Site Project initiated by the USEPA.

The temporary variance would allow the facility to place the ACM directly within the working face. This disposal method is necessary, since there is not a sufficient volume of waste placed in the new cell to provide burial of the material at the time that is required by the facility's Solid Waste Permit.

Based on a telephone conversation between Mr. Bijan Sharafkhani, of the Solid Waste Division, and Mr. William Coltrin, of LDEQ/Air Quality Division, the Air Quality Division that oversees the disposition of ACM in the state, has no objection to this method of disposal.

Therefore, after considering all these facts, your request is hereby approved. Please notify us in writing of any changes made from this proposed disposal practice.
